

## **Syllabus for Clinical Programmer**

### **Become a Clinical Programmer in 8 weeks**

#### **Why choose COE Pharma for your training needs?**

- COE Pharma will prepare a comprehensive (end-to-end) training for programming in Clinical Trials in which you will gain the necessary skills to:
  - create specifications for domains and datasets
  - produce and validate SDTM\* domains
- You will work in a collaborative environment and hone communication and negotiation skills in your role as source programmer or validator.
- It is expected that you will meet the deadline of the project and will produce output with good quality.
- At the end of the training program, you will have your own Portfolio (with codes/output) to present at job interviews and you will have a better understanding of the clinical research process.
- You will be mentored to ace the interview through the mock-up interview sessions.

#### **What will you know at the end of the course?**

- Be able to provide data analysis support, develop programs using SAS or other data analysis programming tools to generate and validate datasets.
- Be able to generate reports such as Data Listings, Subject Profiles, Edit Checks for clinical project reports and medical research using PROC Report, Data Null, SAS arrays, PROC SQL and Macros.
- Be able to implement CDISC\* standards for data mapping and analysis in Clinical Trials.
- Be able to communicate effectively with data management, statisticians and other cross-functional teams to ensure data quality and consistency.
- Ability to assess workload and negotiate timelines.

#### **Pre-requisite:**

- BS. in Bioinformatics, Biotechnology, Biostatistics, Data Science or any analytical background.
- Minimum knowledge about SAS or R programming and willingness to put effort into learning new skills.

## What can you do as Clinical Programmer in the pharmaceutical industry?

### **Clinical Programmer**

**Median Pay (Salary.com, Clinical Programmer I San Francisco):**

**\$89,404**

Data edit checks

External data transfer agreement (DTA) and acceptance check

External data conversion

Patient profile creation

Data snapshot creation/documentation

Regular uploads of data visualization data

At the end of this document is a list of acronyms used in the following table.

Note: CDISC\* standards are an industry-wide methods for submitting data to regulatory authorities like the FDA\*. Learning about CDISC\* standards is important to a career in the pharmaceutical industry.

| Week  | Task   | Active (Live Sessions) Training<br>(Expected: 40 hours)   | Student Learning/Hands-on<br>(Expected: 80 hours) |
|-------|--|---|---|
|       |  | 5 hours per week (Mon, Wed, Fri)<br>Monday: 1 pm – 3 pm PST<br>Wednesday: 10 am – 12 pm PST<br>Friday: 1 pm – 2 pm PST  | 10 hours per week                                 |

## Acronyms:

|             |  |
|-------------|--|
| AE          | Adverse Events   |
| CDISC       | Clinical Data Interchange Standards Consortium   |
| CM          | Concomitant Medications  |
| CRF         | Case Report Form   |
| Define.xml  | File that describes any tabular dataset structure. When used with the CDISC Foundational Standards, it provides the metadata   |
| DS          | Disposition  |
| EX          | Exposure   |
| FA          | Findings About   |
| FDA         | Food and Drug Administration   |
| IE          | Inclusion/Exclusion Criteria Not Met   |
| LB          | Laboratory Test Results  |
| MedDRA      | Medical Dictionary for Regulatory Activities   |
| MH          | Medical History  |
| Pinnacle 21 | Also previously known as OpenCDISC Validator, provides great compliance checks against CDISC outputs like SDTM and Define.xml. |
| R           | The R Project for Statistical Computing  |
| SAP         | Statistical Analysis Plan  |
| SAS         | Statistical Analysis System  |
| SDRG        | Study Data Reviewer's Guide  |
| SDTM        | Study Data Tabulation Model  |
| SV          | Subject Visits   |
| TA          | Trial Arms   |
| TE          | Trial Elements   |
| TI          | Trial Inclusion/Exclusion Criteria   |
| TV          | Trial Visits   |
| WHODrug     | WHO Drug Dictionary  |
